

# AUTHOR INDEX TO VOLUME 20

- Acharya, H. S.—  
A note on the methods for determining soil water diffusivity 61
- Allison, G. B., and Firth, J. R.—  
Estimation of historical groundwater recharge rate 255
- Alston, A. M., and Graham, Robin D.—  
The influence of soil nitrogen status and previous crop on nitrogen fixation (acetylene reduction) in barrel medic, *Medicago truncatula* Gaertn. 51
- Aylmore, L. A. G., and Sills, I. D.—  
Characterization of soil structure and stability using modulus of rupture-exchangeable sodium percentage relationships 213
- Baker, G. C.—  
See Williams, Baden G. 107
- Boughton, W. C., and Sefton, F. T.—  
Effect of rainfall data errors on the optimized values of model parameters 15
- Butler, B. E.—  
Developments in the approach to soil studies in Australia 347
- Chan, K. Y.—  
Shrinkage characteristics of soil clods from a grey clay under intensive cultivation 65
- Chartres, C. J.—  
The pedogenesis of desert loam soil in the Barrier Range, western New South Wales. I. Soil parent materials 269
- Chaudhary, T. N.—  
See Gupta, S. K. 225
- Childs, C. W., Downes, C. J., and Wells, N.—  
Hydrous iron oxide minerals with short range order deposited in a spring/stream system, Tongariro National Park, New Zealand 119
- Chittleborough, D. J.—  
Effect of the method of dispersion on the yield of clay and fine clay 339
- Clothier, W. E.—  
See Scotter, D. 295
- Collis-George, N.—  
See Lloyd, Jocelyn, E. 203
- Coventry, R. J.—  
The distribution of red, yellow and grey earths in the Torrens Creek area, central North Queensland 1
- Dayananda, P. W. A.—  
See Rose, C. W. 23
- Downes, C. J.—  
See Childs, C. W. 119
- Forth, J. R.—  
See Allison, G. B. 255
- Gilkes, R. J.—  
See Palmer, B. 243; Little, I. P. 351
- Graham, Robin D.—  
See Alston, A. M. 51
- Gupta, S. K., Chaudhary, T. N., and Pandey, R. N.—  
Nitrate movement in sandy soil under varying water and fertilizer management 225
- Harper, E. R.—  
See Scotter, D. 295
- Hogarth, W. L.—  
See Rose, C. W. 23
- Holford, I. C. R.—  
The comparative significance and utility of the Freundlich and Langmuir parameters for characterizing sorption and plant availability of phosphate in soils 233
- Isbell, R. F.—  
See Spain, A. V. 147
- Jessop, R. S., and Mahoney, Janet —  
Effects of lime on the growth and nodulation of four grain legumes 265
- John, R. D.—  
See Spain, A. V. 147
- Johns, G. C.—  
Measurement and simulation of evaporation from a red earth.  
I. Measurement in a glasshouse using a neutron moisture meter 165  
II. Simulation using different evaporation functions 179
- Kanchanasut, P., and Scotter, D.—  
Leaching patterns in soil under pasture and crop 193
- Kennedy, J. A., Powell, H. J. K., and White, J. M.—  
A modification of Childs' field test for ferrous iron and ferric-organic complexes in soils 261
- Koppi, A. J.—  
Reply 69

- Little, I. P., and Gilkes, R. J.—  
Aluminium substitution in goethites in soils  
from alluvium, Gippsland, Victoria 351
- Lloyd, Jocelyn E., and Collis-George, N.—  
A torsional shear box for determining the  
shear strength of agricultural soils 203
- Loveday, J.—  
See McIntyre, D. S. 71, 81, 91, 101
- McIntyre, D. S.—  
Capillary rise from saline groundwater in  
clay soil cores 305
- McIntyre, D. S., Loveday, J., and  
Watson, C. L.—  
Field studies of water and salt movement in  
an irrigated swelling clay soil.  
I. Infiltration during ponding 81  
II. Profile hydrology during ponding 91  
III. Salt movement during ponding 101
- McIntyre, D. S., Watson, C. L., and  
Loveday, J.—  
Swelling of a clay soil profile under  
ponding 71
- McIntyre, D. S., and Sleeman, J. R.—  
Macropores and hydraulic conductivity in a  
swelling soil 251
- Mahoney, Janet—  
See Jessop, R. S. 265
- Milnes, A. R.—  
See Northcote, K. H. 69
- Northcote, K. H., and Milnes, A. R.—  
Comment 69
- Oades, J. M.—  
See Shanmaganathan, R. T. 315
- Olsson, K. A.—  
See Willatt, S. T. 139
- Palmer, B., and Wilkes, R. J.—  
Reversion of calcined calcium aluminium  
phosphate fertilizers due to  
rehydroxylation of crandallite 243
- Pandey, R. N.—  
See Gupta, S. K. 225
- Parlange, J.-Y.—  
See Rose, C. W. 357
- Perrott, K. W.—  
The influence of organic matter from  
humidified clover on the properties of  
amorphous aluminosilicates. III.  
Potassium-magnesium exchange  
selectivity 159
- Powell, H. J. K.—  
See Kennedy, J. A. 261
- Probert, M. E.—  
See Spain, A. V. 147
- Rengasamy, P.—  
Dispersion of calcium clay 153
- Rose, C. W., Hogart, W. L., and  
Dayananda, P. W. A.—  
Movement of peak solute concentration  
position by leaching in a non-sorbing  
soil 23
- Rose, C. W., and Parlange, J.-Y.—  
Addendum 357
- Scotter, D. R., Clothier, B. E., and  
Harper, E. R.—  
Measuring saturated hydraulic conductivity  
and sorptivity using twin rings 295  
See also Kanchanasut, P. 193
- Sefe, F. T.—  
See Boughton, W. C. 15
- Shanmaganathan, R. T., and Oades, J. M.—  
Effect of dispersible clay on the physical  
properties of the B horizon of a  
red-brown earth 315
- Sills, I. D.—  
See Aylmore, L. A. G. 213
- Sleeman, J. R.—  
See McIntyre, D. S. 251
- Spain, A. V., Probert, M. E., Isbell, R. F.,  
and John, R. D.—  
Loss-on-ignition and the carbon contents of  
Australian soils 147
- Tucker, B. M.—  
Interaction of chlorides with soils 325
- Walker, P. H.—  
See Willett, I. R. 281
- Watson, C. L.—  
See McIntyre, D. S. 71, 81, 91, 101
- Watson, James D.—  
Analysis of salinity profiles in lateritic soils  
of south-western Western Australia 37
- Wells, N.—  
See Childs, C. W. 119
- White, J. M.—  
See Kennedy, J. A. 261

Willatt, S. T., and Olsson, K. A.—  
Root distribution and water uptake by  
irrigated soybeans on a duplex  
soil 139

Willett, I. R.—  
Phosphorus availability in soils  
subjected to short periods of drying  
and flooding 131

Willett, I. R., and Walker, P. H.—  
Soil morphology and distribution of iron  
and sulfur fractions in a coastal flood  
plain toposequence 283

Williams, Baden G., and Baker, G. C.—  
An electromagnetic induction technique for  
reconnaissance surveys of soil salinity  
hazards 107
